Preventing AIDS and other STDS through Sexuality Education for Students with Intellectual Impairments

Compendium of teaching and learning activities geared to adapted curricula:

Secondary level: first and second cycles

This publication is not itself a guide to sexuality education; its aim, rather, is to see that teaching staff are at least minimally equipped to talk with these students about AIDS and other STDs in a context of sexuality education.

This publication is for teachers of the first or second cycle of secondary school who work with students who have *moderate to severe intellectual impairments*, whether the learning environment is a regular class, resource class, special class or special school. However, it could also be useful to partners in various other sectors who work with the same clientele (e.g. staff of rehabilitation centres or CLSCs, professionals in the education network, significant persons who help the student).

Registered Disability Savings Plans (RDSPs) Régime enregistré d'épargne-invalidité (REEI)

The purpose of such a plan is to provide for the long-term financial security of a beneficiary who has a prolonged and severe physical or mental impairment. The beneficiary named under an RDSP must be eligible to receive the disability tax credit.

Un régime enregistré d'épargne-invalidité (**REEI**) est un régime d'épargne visant à aider les parents et d'autres personnes à accumuler de l'épargne et à assurer ainsi la sécurité financière à long terme d'une personne qui a droit au crédit d'impôt pour personnes handicapées
